

## RTB TROFFER BRACKET KITS

### Description and Application

Envirobrite® 2000 Series RTB Troffer Brackets are the key to ideal photometrics. They ensure proper placement of the lamp within the retrofit kit to provide maximum efficiency.

- Rounded-edges to avoid injury during installation
- 9-3/4" lamp spacing enables ideal lighting to the work plane and proper positioning within 18-cell parabolic retrofits
- Unique bracket design UL approved for no wire guard requirement
- Two, three or four lamp configurations
- Lance and form bracket design for easy pinch in reflector installation
- Variable tek screw slot locations for multiple mounting options
- Slots, instead of holes, provided for easy alignment and centering
- Less than 2" reflector depth to fit shallow fixtures
- Snap-in lamp holders won't fall out during overhead installation

### Design

Envirobrite® brackets are designed by our expert in house lighting engineers for ideal lamp placement and trouble-free installation. Every Envirobrite® bracket is designed to meet UL 1570 specifications for safety. Our rigid, light weight bracketing systems are produced with custom designed stamping dies and are very easy to install.
