## PSB - Prewired Strip Retrofit Kit

### DESCRIPTION & APPLICATION

Envirobrite® prewired strip brackets are designed for simple, safe, and trouble free installation. Mounting is easy with slots instead of holes for flexible placement within the existing fixture body. This pre-wired feature saves on installation time as the brackets are assembled in the factory with jumpers, lamp holders, and ballast disconnects already set.

### FEATURES & BENEFITS

- Significant energy savings through delamping and/or relamping existing fixtures
- Aluminum components provide less maintenance and lasting appeal
- 100% recyclable
- Snap-in lamp holders won't fall out during overhead installation
- Streamlined packaging for easy job site material management
- Bracket adjusts to channel size of 4.25 and 5.0
- Quarter turn slots for easy ballast cover or strip reflector maintenance
