

T8

PTB - Pre-Wired Troffer Bracket Kit

DESCRIPTION & APPLICATION

Envirobrite® prewired troffer brackets are designed for simple, safe, trouble free installation. Mounting is easy with slots instead of holes for flexible placement within the existing fixture body. The brackets are also designed for flexible mounting location - either mounted inside the top or on the end cap of the existing troffer.

FEATURES & BENEFITS

- Significant energy savings through delamping and/or relamping existing fixtures
- Significantly enhances existing fixture efficiencies
- Aluminum components provide less maintenance and lasting appeal
- 100% recyclable
- Hard tooled rounded edge brackets for improved installer safety
- Snap-in lamp holders won't fall out during overhead installation
- Streamlined packaging for easy job site material management
- 9 3/4" lamp spacing enhances appearance of 18 cell parabolic retrofits
